EDUCATION

D Y Patil International University

Bachelor of Computer Science & Technology

Aug 2024 – Aug 2028

Pune, India

SUMMARY

Computer Science Engineering student with a strong interest in data analytics and data-driven problem solving. Skilled in Python, SQL, and Microsoft Excel for data cleaning, data visualization, and data interpretation. Experienced in working with structured data and developing practical projects, with a focus on extracting insights and supporting decision-making.

SKILLS

Programming Languages: Python, C/C++, Java, SQL

Core Concepts: Data Structures & Algorithms, DBMS, Object-Oriented Programming (OOP), Operating Systems

Data Analysis & Libraries: NumPy, Pandas, Data Cleaning, Data Visualization

Tools & Technologies: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, API Handling, CSV/JSON Data Handling

Soft Skills: Problem Solving, Analytical Thinking, Leadership & Team Collaboration

PROJECTS

Smart Parking System

- Designed a real-time parking management system to optimize slot allocation
- Implemented slot tracking and user interaction features for improved efficiency
- Enhanced system performance and user experience through structured design
- **Technologies Used:** Python, Data Handling

Smart Dustbin (IOT-Based)

- Developed an automated dustbin using sensors for touchless lid operation
- Integrated waste level detection for real-time monitoring
- Improved hygiene and supported smart waste management solutions
- **Technologies Used:** IoT Concepts, Sensors

Traffic Signal Control System

- Built a traffic signal system using sequential logic to simulate real-world traffic flow
- Implemented timed transitions between signals for controlled operation
- Applied circuit design and control system concepts
- Gained practical understanding of timing mechanisms and system behavior

Calculator Application

- Developed a Python-based calculator for performing arithmetic operations
- Implemented input validation and error handling for reliable usage
- Applied programming concepts such as functions and conditional logic
- Managed version control using GitHub
- [Github link](#)
- **Technologies Used:** Python

PROFFESIONAL EXPERIENCE

Intern

Sevadeep NGO, Pune (*May 2025 – July 2025*)

Supported community outreach initiatives by organizing and managing structured data using Microsoft Excel and Google Sheets. Assisted in tracking resources, participation, and activity outcomes through data collection and analysis. Contributed to improving workflow efficiency and supported data-driven decision-making during program execution.

CERTIFICATION

Technology Commercialization, Part 1: Setting up your Idea Filtering System University of Rochester | Coursera | Feb 2026 | [Certificate](#)

Data Mining in Python University of Michigan | Coursera | Apr 2026 | [Certificate](#)
